

REMARKS

Applicant respectfully requests reconsideration and allowance of the subject application.

Claims 1-16 were originally submitted.

Claims 1-19 and 30-33 are canceled without prejudice.

Claims 20, 23, 24, and 29 are currently amended.

Claims 20-29 have been previously added.

Claim 34 is added in this response.

Claim 20-29 and 34 remain in this application.

Allowable Subject Matter

Claim 29 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all the limitations of the base claim and any intervening claims.

The Office provides the following reasons for allowance of Claim 29: "The prior art cited in its entirety fails to teach or suggest a method of identifying missing glyphs at the remote terminal, and storing the fragment index on a local computer system for maintaining the fragment cache on the remote terminal, and the fragment cache identified by the fragment index".

Claim 29 has been amended to overcome the objection. Furthermore, claims 20-28 and 34 have been amended to, or as written, depend upon independent claim 29. Applicant appreciates the allowance of claims 20-29 and 34.

1 **35 USC § 103**

2 Claims 1, 17-28 and 30-33 are rejected under 35 USC § 103(a) as being
3 unpatentable over an article by Peter Druschel, Larry L. Peterson et al (Druschel),
4 in view of an article by Paul R. Calder and Mark A. Linton et al (Calder).

5 Claims 1-19 and 30-33 have been canceled without prejudice. Claims 20-
6 28 have been amended, or as written, depend from allowable base claim 29.

1 **CONCLUSION**

2 All pending claims 20-29 and 34 are in condition for allowance. Applicant
3 respectfully requests reconsideration and prompt issuance of the subject
4 application. If any issues remain that prevent issuance of this application, the
5 Examiner is urged to contact the undersigned attorney before issuing a subsequent
6 Action.
